

create users first,
Rails template takes
care of this

users		
PK	user_id	integer
	name	string
	email	string

create this relationship
after creating trips

trips		
PK	trip_id	integer
FK	user_id	integer
	name	string
	type	enum
	description	string
	center_lng	number
	center_lat	number
	start_lng	number
	start_lat	number
	end_lng	number
	end_lat	number

create trips
after users

create relationships
with markers
after creating markers

markers		
PK	marker_id	integer
FK	trip_id	integer
FK	user_id	integer
	name	string
	description	string
	image_url	string
	poi_url	string

create markers after
the relationship
between users and trips
is done
